# UNITED BANK FOR AFRICA PLC

... Strong Earnings Performance Amid Rising Funding Costs

May 05, 2025 Earnings Note

#### **Event**

United Bank of Africa Plc ("the Group") delivered a strong start to the year, with gross earnings up 34% and profit after tax rising 33% year-on-year. The Group benefited from higher asset yields and improved margins, despite a jump in funding and credit costs. Strong growth in non-interest income and disciplined cost management further supported earnings momentum.

# Strong Growth in Interest Income, but Asset Mix Shifted.

Interest income rose by 36% to N599.83bn from N440.77bn in Q1 2024. This was driven by a 17% growth in income from loans and advances (N229.35bn vs N195.31bn) and a 44% spike in income from investment securities (N289.08bn vs N201.03bn). Notably, the contribution of interest income from loans to customer to total interest income declined to 38% from 44%, while investment securities' share expanded to 48% from 46%. This reflects UBA's growing preference for safer, higher-yielding government instruments amid elevated interest rates. Overall, asset yield improved to 11% from 9% in Q1 2024, supported by both the higher rate environment and a marginal 2% year-to-date growth in interest-earning assets to N21.32trn.

# Rising Funding Costs, but Net Interest Margin Expanded.

Interest expenses surged by 77% year-on-year to N247.96bn (Q1 2024: N140.09bn), largely driven by higher costs on customer deposits (up 98% to N167.82bn) and payment on bank deposits (up 86% to N53.44bn). In our view, the steep jump in interest cost reflects the impact of tighter liquidity conditions in the financial system. Specifically, the CBN's hawkish stance - including active OMO mop-ups and a high CRR regime - significantly drained system liquidity. In addition, strong government borrowing via high-yield FGN bonds and T-bills pulled funds away from banks, forcing them to offer higher rates to retain deposits. Additionally, a warm 4% year-to-date rise in interest-bearing liabilities to N22.91trn also contributed to the jump. Consequently, cost of funds rose to 4.33% from 2.78%. Despite funding pressure, UBA delivered a 17% growth in net interest income to N351.88bn, while net interest margin (NIM) expanded slowly to 6.93% from 6.65%, reflecting strong asset re-pricing benefits.

## **Higher Credit Provisions**

Impairment charges spiked to N14.18bn from N3.28bn, mainly on the back of a higher allowance for credit losses of N18.61bn compared to N7.14bn in Q1 2024. This suggests a more cautious approach to loan loss provisioning.

## **Broad-Based Growth in Non-Interest Income.**

Non-interest income rose by 27% year-on-year to N164.48bn (Q1 2024: N129.39bn), led by a 9% rise in fee and commission income to N124.07bn. This growth was supported by jumps in credit-related fees, account maintenance charges, and electronic banking income. Trading income also surged by 211% to N37.04bn, driven largely by a N20.46bn contribution from fixed-income securities trading.

## **Disciplined Cost Management**

Operating income rose by 20% year-on-year to N450.06bn, driven by strong growth in core banking activities. Meanwhile, total operating expenses grew at a slower pace of 12% year-on-year to N245.79bn, reflecting improved cost efficiency. The expense growth was mainly due to a 27% increase in employee benefit expenses, which rose to N84.32bn, likely due to salary adjustments and workforce expansion. Additionally, other operating expenses, including the AMCON levy and NDIC insurance premiums, rose modestly by 4%. As a result of this positive income-expense gap, cost-to-income ratio improved to 55%, compared to 58% in Q1 2024.

# **Bottom Line Stronger**

UBA's profit before tax grew by 31% year-on-year to N204.27bn, while profit after tax expanded by 33% to N189.84bn. This growth was achieved despite a 4% increase in tax expenses to N14.42bn.

### **Outlook**

Following the impressive Q1 2025 performance, we revise our gross earnings forecast upward to N3.98trn from N3.74trn. This adjustment reflects stronger expected income from investment securities and modest loan book expansion, supported by the elevated interest rate environment.

We maintain our earlier projections on non-interest income. Fee and commission income is expected to be the primary driver in 2025, as we anticipate limited upside from foreign exchange-related gains compared to last year.

On the cost side, operating expenses are expected to remain elevated, largely driven by regulatory charges (such as AMCON levy and deposit insurance premium) and higher employee costs. Nonetheless, we expect the Group to sustain a stable cost-to-income ratio around current levels, supported by strong revenue growth.

Following the Q1 2025 results, we adjusted our fair value estimate upward to N47.54 from N46.82. At current market prices, this implies a decent 52% total return (inclusive of 16% dividend yield), and we maintain our **BUY** position on the stock.

# **Disclaimer & Disclosures**

The value of any investment is subject to fluctuations, i.e., may rise and fall. Past performance is no guide to the future. The rate of exchange between currencies may cause the value of an investment to increase or decrease. Hence investors may not get back the full value of their original investment.

### **Investment Recommendation**

WSTC uses a 3-tier recommendation system for stocks under coverage: Buy, Hold, and Sell.

- Buy Rating: estimated fair value is  $\geq$ 20% above current market price.
- Hold Rating: estimated change in price is between -10% and 19% of current market price.
- Sell Rating: estimated change in price is  $\leq$  -10% of current market price.
